If applicable, submit a copy of the patient's state approved identification requirements, which may vary by state.

### 3 Dispensing Pharmacy Follow-up

If the patient is approved, the provider will receive a follow-up call from the CRP dispensing pharmacy to verify the patient's next injection and shipping date requirements.

#### WARNING: RISK OF SERIOUS HARM OR DEATH WITH INTRAVENOUS ADMINISTRATION; SUBLOCADE RISK EVALUATION AND MITIGATION STRATEGY

- **Serious harm or death could result if administered intravenously. SUBLOCADE forms a solid mass upon contact with body fluids and may cause occlusion, local tissue damage, and thrombo-embolic events, including life threatening pulmonary emboli, if administered intravenously.**
- **Because of the risk of serious harm or death that could result from intravenous self-administration, SUBLOCADE is only available through a restricted program called the SUBLOCADE REMS Program. Healthcare settings and pharmacies that order and dispense SUBLOCADE must be certified in this program and comply with the REMS requirements.**

*Indivior® reserves the right to cancel, revoke, or change the INSUPPORT program as they choose without prior notice.*
